Buyers: Be sure to have services transferred into your name as of the date of closing escrow or as of the date you are taking occupancy. You may want to call one to two weeks early, as some services may require deposits.

Sellers: Be sure to have services transferred out of your name a day or two after close of escrow (unless you are staying in residence and renting back from your buyer, then it would be through your residency). You will need to have services on through the close of escrow whether you move sooner or not.
